# Inspector Report 2022

This report is an assessment of the administration of HHUS, based on the HHUS statutes and regulations. The annual meeting and the HHUS board appointed me in the inspector role in April 2022, when the annual meeting was held. This report covers the remaining part of the calendar year 2022.

The board meetings were held physically. I have in my role as the Inspector attended some of the board meetings and have had discussions primarily with the presidium. The board meets regularly and material for the meeting is sent out in advance. The board of 2022 has continued the tradition of well-planned and organized meetings. Minutes are published on the HHUS website along with all statutes, policies, and regulations, making the work transparent, well documented, and possible to follow for the members. All documents are accessible in English.

The activities continue to contribute to a positive and memorable study time for the students at the Umeå School of Business, Economics and Statistics. The finances are carefully overseen, which enables continued development of the various activities within the association.

My advice is to grant discharge to the HHUS board.
